

Senior Tenured or Tenure-Track Position

Mouse Cancer Genetics Program, NCI CCR

(deadline: January 2)

The Mouse Cancer Genetics Program (MCGP), Center for Cancer Research (CCR), National Cancer Institute (NCI), National Institutes of Health (NIH), Department of Health and Human Services (DHHS) is accepting applications for the position of a Senior Tenured or Tenure-Track Investigator to develop an independent research program focused on mechanistic analysis in cancer biology. The current MCGP labs focus on the in vivo analysis of complex biological problems, with expertise in the areas of cell cycle regulation, apoptosis, genome stability, receptor tyrosine kinase signaling in development and cancer, angiogenesis, stem cell regulation and complex genetics. In addition, the newly established NCI Center for Advanced Preclinical Research (CAPR) provides a unique opportunity to translate basic discovery into preclinical and clinical application using an extensive infrastructure that incorporates the use of genetically engineered cancer models with modern analytical technologies and therapeutic/diagnostic development. Candidate will develop/sustain a laboratory that is focused on complex cancer-related biological processes, building on the existing strengths of MCGP.

Areas of emphasis for recruitment include metastasis, cancer-propagating (stem) cells and mechanisms, the cancer microenvironment (particularly the role of immune system), and mechanisms of resistance. Candidates are expected to establish or continue highly competitive research programs in one or more of these areas. Utilization of comparative genomics, proteomics, and/or complex genetics in the approach to these problems is desired, but not required. Candidates must have strong written and oral communication skills; record of high quality publications showing significant contributions to the conceptual understanding of cancer mechanisms; have strong analytical skills and a demonstrated ability for collaborative or team science; and must be sufficiently experienced to function independently, both in the development of their own research efforts and (in the case of established investigators) in the mentoring and supervision of junior investigators. Applicant will be provided sufficient space, equipment and supply budget. Salary is competitive and commensurate with research experience and accomplishments and a full Civil Service package of benefits (including retirement, health insurance, life insurance, and a Thrift Savings Plan). Candidates may be eligible for the NIH Loan Repayment Program. This position is not restricted to U.S. citizens but candidates must have a Ph.D. and/or M.D. degree.

Interested individuals should send a cover letter, curriculum vitae, a brief summary of research experience, accomplishments and research interests and goals, copies of three publications or reprints, and have at least three letters of reference sent to: Ms. Elizabeth Brawner, Administrative Officer; NCI-Frederick, PO Box B, Bldg. 578; Frederick, Maryland 21702-1201. Tel. 301-846-1066, fax 301-846-6053, e-mail: brawnere@mail.nih.gov <<mailto:brawnere@mail.nih.gov>> , by January 2, 2009. PDF files are encouraged. DHHS, NIH, and NCI are Equal Opportunity Employers.

###

Chief

Genetic Epidemiology Branch, NCI

(deadline: January 2*)

The Division of Cancer Epidemiology and Genetics (DCEG), National Cancer Institute (NCI), National Institutes of Health (NIH) is recruiting a senior clinician scientist or epidemiologist to serve as Chief of the Genetic Epidemiology Branch (GEB). The GEB carries out integrated interdisciplinary research projects that are designed to identify genetic variation, host susceptibility factors, and exposures affecting cancer risk; to estimate risk of cancers associated with genetic variation within families and the general population; to characterize gene-gene and gene-environment interactions and exposure response relationships; to elucidate biological mechanisms of action; to identify susceptible populations; and to improve research methods for genetic epidemiology.

The Branch Chief will have the opportunity and resources to conduct an independent program of research and to shape the research direction of GEB. GEB currently includes a staff of 9 tenured or tenure-track investigators as well as staff clinicians/staff scientists and pre- and post-doctoral fellows; additional recruitments are anticipated. Resources available to GEB include a large family registry, access to biorepositories for processing and storage of biospecimens, a core genotyping and other laboratory facilities, and contracts for computer programming and for family and epidemiologic field studies. In addition to managing these resources, the Chief oversees the administrative management of the Branch, supervises staff members, mentors tenure-track investigators and post-doctoral fellows, and ensures the scientific quality of GEB research. Other duties include providing consultation to national and international investigators and public health officials, and acting as liaison with agencies and organizations seeking expertise related to genetic epidemiology, interdisciplinary studies of genetic variation in the etiology of cancer, and cancer prevention. The successful candidate must hold either a medical degree or a doctoral degree in epidemiology or related fields. He or she must demonstrate knowledge of cancer genetics and genetic epidemiology as well as a proven ability to: (1) conduct high-quality original research using epidemiologic and interdisciplinary approaches to investigate the role of genetic variation in the etiology of cancer; and (2) publish such work in peer-reviewed scientific or medical journals and present it at scientific meetings. The candidate must also demonstrate administrative experience, including supervision at a senior level of scientific management.

The Chief of the Genetic Epidemiology Branch will be appointed with tenure at a salary commensurate with his/her qualifications and experience. Full Federal benefits including leave, health and life insurance, long-term care insurance, retirement, and savings plan (401k equivalent) will be provided. Qualified candidates may be considered for the NIH Senior Biomedical Research Service. Interested individuals should send a cover letter, curriculum vitae and bibliography, a brief summary of research interests and accomplishments, scientific administrative experience, copies of up to five publications or preprints, and the names and addresses of three references to: Ms. Sarah Del Castillo; Division of Cancer Epidemiology and Genetics; National Cancer Institute; 6120 Executive Blvd., Room 8093; Bethesda, MD 20892. E-mail: delcastillos@mail.nih.gov <<mailto:delcastillos@mail.nih.gov>> . Applications received by January 2 will be considered for a first round of interviews; however, applications will be accepted until the position is filled. The DHHS and NIH are Equal Opportunity Employers.

###

Tenured Clinical Investigator

Mood and Anxiety Disorders Program, NIMH

(deadline: January 5*)

The Mood and Anxiety Disorders Program, Division of Intramural Research Programs (DIRP), National Institute of Mental Health (NIMH), National Institutes of Health (NIH), seeks a highly accomplished Tenured Clinical Investigator conducting clinical trials in mood disorders to head an active, ongoing program in this area which will have access to an inpatient ward with 10-12 beds in the NIH Clinical Center, the nation's largest hospital devoted entirely to clinical research. The position comes with a budget and staff. The strong scientific environment and outstanding resources at NIMH make this a unique opportunity for a high-achieving scientist. The position also offers unparalleled opportunities for interdisciplinary collaboration with scientists throughout the NIH. The successful candidate will be expected to strengthen the current program.

Applicants should have: 1) an M.D. degree, and be board certified in Psychiatry; 2) experience (including protocol development, implementation, drug development, single-site studies, publications, etc.) as an investigator in translational clinical research. Such experience would include directly applying relevant preclinical findings into randomized placebo-controlled proof-of-concept trials with novel compounds in treatment-resistant depression and mania; 3)

experience in biomarker studies, applying the techniques of neuropsychopharmacology, electrophysiology, neuropsychology, and neuroimaging to research involved in the development of novel therapeutics for mood disorders; 4) national/international recognition for experimental therapeutic studies in mood disorders; and 5) experience administering a therapeutic development research program.

The ideal candidate must have a record of high scientific achievement as an independent investigator. The candidate should also have substantial clinical achievements, as well as leadership experience, including oversight of team members. Finally, applicants should have experience directly administering a research program. These achievements should be nationally and internationally recognized. Salary is commensurate with experience and accomplishments, and a full Civil Service package of benefits (including retirement, health, life, and long-term care insurance, as well as a Thrift Savings Plan, etc.) is available. NIMH is a major research component of the National Institutes of Health and the Department of Health and Human Services, which have nationwide responsibility for improving the health and well-being of all Americans. Interested applicants should send curriculum vitae, bibliography, statement of research interests, accomplishments, and goals, together with six letters of reference to: Dr. Judith Rapoport, Chair, Search Committee for Experimental Therapeutics, NIMH, NIH, Bldg. 10, Rm. 4N-222, 9000 Rockville Pike, Bethesda, MD 20892; or e-mail to: steyerm@mail.nih.gov <<mailto:steyerm@mail.nih.gov>>. Review of applications will begin January 5, 2009, but applications will continue to be accepted and considered until the position is filled. NIH and DHHS are Equal Opportunity Employers.

###

Staff Scientist, Director

Division of Intramural Research Programs, NIMH

(deadline: January 5)

The Division of Intramural Research Programs (DIRP), National Institute of Mental Health (NIMH), National Institutes of Health (NIH), seeks an accomplished Staff Scientist to be the Director of the Scientific Core for Mental Health Services, Economics, and Public Health; to conduct research and analyses that enable NIMH to address key scientific and policy issues relating to mental health services and intervention research in a proactive way, in service of NIMH's strategic objective of strengthening the public health impact of NIMH-supported research. The Core Director has full responsibility for the policy, planning, scientific and fiscal

management, analysis, and operational aspects of the Core. The position comes with a budget and staff. The strong scientific environment and outstanding resources at NIMH make this a unique opportunity for a high-achieving scientist. The position also offers unparalleled opportunities for inter-disciplinary collaboration with scientists throughout the NIH. The successful candidate will be expected to complement and strengthen the current NIMH Division of Intramural Research Program, the Extramural Research Program and other divisions and offices within NIMH, and at the level of the NIMH Director's Office.

Applicants should have a Ph.D. or equivalent degree in economics or health services research, and a minimum of ten years of experience conducting policy-relevant health economics and health services research, with particular focus on research relating to the development and dissemination of evidence-based mental health practice, including financing issues; and experience engaging and working with key stakeholder groups, such as large employers and public and private health plans. The ideal candidate must have a record of high scientific achievement and should also have leadership experience, including oversight of team members. Finally, applicants should have experience directly administering a research program. These achievements should be nationally and/or internationally recognized. Salary is commensurate with experience and accomplishments, and a full Civil Service package of benefits (including retirement, health, life, and long-term care insurance, as well as a Thrift Savings Plan, etc.) is available.

NIMH is a major research component of the National Institutes of Health and the Department of Health and Human Services, which have nationwide responsibility for improving the health and well-being of all Americans. Interested applicants should send curriculum vitae, bibliography, statement of research interests, accomplishments and experience with research administration, and goals, written statement with perspective on the needs and opportunities necessary to move from having clinically efficacious interventions to achieving large-scale use of such interventions and resulting public health benefits. Statement should indicate how the applicant's particular expertise and background could contribute to this transition. Applicant should also send three letters of reference to: Dr. Richard Frank, Chair, Search Committee for Scientific Core, NIMH, NIH, Bldg. 10, Rm. 4N-222, 9000 Rockville Pike, Bethesda, MD 20892-1381; or e-mail to: Steyerm@mail.nih.gov <<mailto:Steyerm@mail.nih.gov>>. Application deadline: January 5, 2009. NIH and DHHS are Equal Opportunity Employers.

###

Tenured or Tenure-Track Position

Mood and Anxiety Disorders Program, NIMH

(deadline: January 12*)

The Division of Intramural Research Programs (DIRP), National Institute of Mental Health (NIMH), invites applications for a tenured or tenure track investigator in the Mood and Anxiety Disorders Program (MAP). The candidate is expected to develop an independent research program which will plan and conduct clinical and/or translational research studies on the pathophysiology, etiology, and treatment of mood disorders and their comorbid conditions such as anxiety disorders; and will be provided with personnel and budget to conduct this research. The candidate must have an M.D. and/or Ph.D. in psychiatry or related discipline with broad research experience, including a record of high scientific achievement as an independent clinical or preclinical investigator; experience in direct administration of a research program; and national and/or international recognition.

Salary is commensurate with experience and accomplishments, and a full Civil Service package of benefits (including retirement, health, life, and long term care insurance, Thrift Savings Plan participation, etc.) is available. The National Institute of Mental Health (NIMH), is a major research component of the National Institutes of Health (NIH) and the Department of Health and Human Services (DHHS), and has nation-wide responsibility for improving the health and well being of all Americans, the Department of Health and Human Services oversees the biomedical research programs of the National Institutes of Health and those of NIH's research Institutes.

Interested candidates should send resume and six reference letters to: Dr. David Sweat, Chair, MAP Search Committee, National Institute of Mental Health, Bldg. 10, Rm. 4N-222, 9000 Rockville Pike, Bethesda, MD 20892; or by e-mail to steyerm@mail.nih.gov <<mailto:steyerm@mail.nih.gov>>. Review of applications will begin January 12th, 2009, but applications will continue to be accepted and considered until the position is filled. HHS and NIH are Equal Opportunity Employers.

###

Tenure-Track Positions

Neurobiology Neurodegeneration & Repair Laboratory, NEI

(deadline: January 30)

The goals of the newly-established Neurobiology, Neurodegeneration and Repair Laboratory (N-NRL) are to facilitate translational research for treatment of retinal diseases by delineating fundamental mechanisms in development, aging and neurodegeneration (www.nei.nih.gov/intramural/nnrl.asp <<http://www.nei.nih.gov/intramural/nnrl.asp>>). We wish to expand our existing research program by recruiting outstanding scientists who will participate in the development of novel therapeutic modalities for retinal diseases based on fundamental understanding of genetic defects and cellular pathways that underlie differentiation, homeostasis and disease pathogenesis.

We are seeking innovative, creative and collaborative scientists, with particular focus of research in the areas of human and/or statistical genetics and cellular/molecular mechanisms of developmental neurobiology and aging. The candidates should have M.D. and/or Ph.D. with training and experience in any of the relevant fields and a significant publication record. Direct experience in vision research is NOT necessary. Salary is commensurate with research experience and accomplishments. A full Federal package of benefits is available (including retirement, health, life and long term care insurance, Thrift Savings Plan, etc.) Applications will be considered as they are received, but it is preferred that they be submitted by January 30, 2009, for full consideration. The search will continue until qualified scientists are recruited. Interested individuals should send (electronically preferred) a cover letter, curriculum vitae, a brief summary of research accomplishments and goals, three to five significant publications, and names of three references to: Lucia Lawrence, Administrative Laboratory Manager; N-NRL National Eye Institute; Building 10, Room 10/10B11, MSC1864; 9000 Rockville Pike; Bethesda, MD 20892. Tel: 301-435-6149; Fax: 301-480-1769; e-mail lawrencel@nei.nih.gov <<mailto:lawrencel@nei.nih.gov>> . The National Eye Institute does not discriminate in employment on the basis of race, color, religion, sex, national origin, political affiliation, sexual orientation, marital status, disability, age, membership in an employee organization, or other non-merit factor. DHHS and NIH are Equal Opportunity Employers.

###

Tenure-Track Biologist

Laboratory of Reproductive and Developmental Toxicology, NIEHS

(deadline: January 31)

A position is available for a Developmental Biologist to establish an independent basic research

program and form a research group in the Laboratory of Reproductive and Developmental Toxicology, Division of Intramural Research. Applications are invited from scientists with demonstrated ability for creative and productive research in cellular and molecular mechanisms of mammalian development. Of particular interest are investigators using rodent models to study cell interactions, epigenetics or other basic biomedical problems relating to the impact of the environment on development. The successful candidate will interact with investigators studying diverse problems in reproductive biology, developmental toxicology, hormone mechanisms, signal transduction, cell cycle regulation, cell growth and differentiation, apoptosis, gene regulation, mutagenesis and DNA repair, and cancer biology.

Minimum qualifications are an M.D., Ph.D., D.V.M. or equivalent doctoral degree in the biomedical sciences, at least three years of postdoctoral experience, and publications in high quality journals. Salary will be commensurate with the experience and qualifications of the candidate. Federal benefits apply. Information about the NIEHS may be found at www.niehs.nih.gov <<http://www.niehs.nih.gov>> and the Laboratory of Reproductive and Developmental Toxicology at www.niehs.nih.gov/research/atniehs/labs/lrdt/index.cfm <<http://www.niehs.nih.gov/research/atniehs/labs/lrdt/index.cfm>> . Applications from women and minorities are encouraged. Interested applicants should provide a curriculum vitae and bibliography, a 2-5 page statement of current research interests and future plans, and have three letters of recommendation sent directly to the address below by January 31, 2009.

Material received after this date may be considered as needed. Mail to: Ms. Cindy Garrard (DIR-8-07); National Institute of Environmental Health Sciences; P.O. Box 12233, Maildrop A2-06; 111 Alexander Drive, Room A206; Research Triangle Park, NC 27709. E-mail: dir-appls@niehs.nih.gov <<mailto:dir-appls@niehs.nih.gov>> . HHS and NIH are Equal Opportunity Employers. We are dedicated to building a diverse community in our training and employment programs.

###

Tenured or Tenured-Track Statistician

Biostatistics Branch, DCEG NCI

(deadline: January 31*)

The Biostatistics Branch (BB) in the Division of Cancer Epidemiology and Genetics (DCEG), National Cancer Institute (NCI), National Institutes of Health (NIH), Department of Health and Human Services (DHHS), is recruiting for a tenure-track/tenure position. BB statisticians

develop statistical research programs and actively collaborate both in cutting-edge studies of genetic, lifestyle, and other environmental causes of cancer and in studies of descriptive and clinical epidemiology and cancer prevention. Statistical research is typically motivated by challenges encountered in DCEG studies, such as choosing an efficient study design, identifying and describing gene-environment interaction, estimating absolute risk, addressing errors in exposure and clinical measurements, and developing strategies to identify true associations in genome-wide scans for genetic variants implicated in disease. We anticipate increasing opportunities for research and applications in high-dimensional data analysis and statistical computing, Bayesian methods, quality control of laboratory measurements, causal inference and methods for longitudinal data analysis. Because of the breadth of the problems we face, however, we seek qualified applicants with all areas of statistical expertise.

Applications will be evaluated on demonstrated potential to develop a creative, independent program of statistical research applicable to cancer epidemiology and genetics, and to collaborate effectively on epidemiologic studies. Applicants should have a doctorate in biostatistics, statistics or a related field, knowledge of the basic approaches used in cancer epidemiology, and knowledge of biostatistical theory and methods. A record of publications demonstrating an ability to conduct independent research on statistical methods is required. Publications documenting collaborative research in epidemiologic, clinical, biomedical or biological sciences are highly desirable. The successful candidate should have strong communication skills to discuss scientific issues with non-statistical colleagues and to write scientific papers.

The incumbent will receive research support from the intramural research program of NIH for computer programming and recruiting a post-doctoral fellow. Interested individuals should send a cover letter; curriculum vitae and bibliography; a brief summary of research experience, accomplishments and research interests and goals; copies of three publications or preprints; and three letters of reference to: Ms. Judy Schwadron; Division of Cancer Epidemiology and Genetics; National Cancer Institute; 6120 Executive Blvd. EPS/8073; Bethesda, MD 20892. Recommendations can be included with the package or sent directly by the recommender to Ms. Schwadron. Candidates should submit applications by January 31, 2009; however, the search will continue until a qualified candidate is found. Additional information about staff and ongoing research in the Division of Cancer Epidemiology and Genetics and in the Biostatistics Branch is available at <http://www.dceg.cancer.gov> <<http://www.dceg.cancer.gov>> . Please contact Dr. Nilanjan Chatterjee (phone 301-402-7933 or chattern@mail.nih.gov <<mailto:chattern@mail.nih.gov>>) for questions about the position. The Department of Health and Human Services and the National Institutes of Health are Equal Opportunity Employers.

###

Tenured or Tenure-Track Investigators

Mood and Anxiety Research Program, NIMH

(deadline: February 1*)

The Mood and Anxiety Disorders Program, Division of Intramural Research, National Institute of Mental Health (NIMH), National Institutes of Health (NIH), seeks an accomplished Tenure Track or Tenured Investigator conducting research in the area of Post Traumatic Stress Disorder (PTSD). The position comes with a budget and staff. The strong scientific environment and outstanding resources at NIMH make this a unique opportunity for a high-achieving scientist. The position also offers unparalleled opportunities for interdisciplinary collaboration with scientists throughout the NIH. The successful candidate will be expected to strengthen the current program.

Applicants should have: 1) an M.D. and/or Ph.D.; 2) must be an independent investigator with active clinical research interests in PTSD, psychiatric responses to traumatic events, and neurobiology of stress; 3) national and/or international recognition; 4) growing body of publications in this field; and 5) leadership experience developing and/or administering a research program.

Salary is commensurate with experience and accomplishments, and a full Civil Service package of benefits (including retirement, health, life, and long-term care insurance, as well as a Thrift Savings Plan, etc.) is available. NIMH is a major research component of the National Institutes of Health and the Department of Health and Human Services, which have nationwide responsibility for improving the health and well-being of all Americans. Interested applicants should send curriculum vitae, bibliography, statement of research interests, accomplishments, and goals, together with six letters of reference to: Dr. Wayne Drevets, Chair, Search Committee for PTSD Investigator, NIMH, NIH, Bldg. 10, Rm. 4N-222, 9000 Rockville Pike, Bethesda, MD 20892-1381; or e-mail to steyerm@mail.nih.gov <<mailto:steyerm@mail.nih.gov>> .

Review of applications will begin on February 1, 2009, but applications will continue to be accepted and considered until the position is filled. NIH and DHHS are Equal Opportunity Employers.

###

Staff Clinician

Office of Clinical Director, NIMH

(deadline: February 1*)

The National Institute of Mental Health (NIMH), Office of the Clinical Director, seeks a Staff Clinician to serve as deputy to the NIMH Clinical Director. Responsibilities include serving as an attending physician on the NIMH Psychiatry Consultation Liaison Service and as the Associate Clinical Fellowship Training Director.

Applicants should have an M.D., be board certified in general psychiatry and have experience in psychosomatic medicine and graduate medical education. Training and/or experience in child and adolescent psychiatry is desirable. Salary is commensurate with experience and accomplishments, and a full Civil Service package of benefits (including retirement, health, life, and long-term care insurance, as well as a Thrift Savings Plan, etc.) is available.

NIMH is a major research component of the National Institutes of Health and the Department of Health and Human Services, which have nationwide responsibility for improving the health and well being of all Americans. Interested applicants should send a curriculum vitae and bibliography, together with three letters of reference to: Maryland Pao, M.D., Clinical Director, NIMH, Building 10-CRC, Room 6-5340, MSC 1276, Bethesda MD 20892-1276 USA or e-mail to paom@mail.nih.gov <<mailto:paom@mail.nih.gov>> by February 1st, 2009 or until position is filled. (This position is subject to a background investigation and a one-year probationary period.) NIH and DHHS are Equal Opportunity Employers.

###

Tenured or Tenure-Track Investigators

Surgery Branch, NCI CCR

(deadline: February 2)

The Surgery Branch of the NCI Center for Cancer Research is seeking applicants for two tenure track or tenure eligible positions:

1. The Surgery Branch is seeking an established Investigator and Head, Endocrine Surgery Section. Candidates must be Board certified in general surgery with documented clinical expertise in endocrine surgery.

2. The Surgery Branch is seeking a promising or established Investigator to join and perhaps Head the Gastrointestinal Surgical Oncology Section. Candidates must be Board certified in general surgery with documented clinical expertise in surgical oncology.

These recruitments are for tenure-track or tenure-eligible investigators. Candidates must have a record of competence and productivity that indicates track records of, or potential for, establishing independent clinical research programs pertaining to the development of innovative approaches to treatment. The resources necessary to establish and sustain a vigorous clinical, and if applicable, laboratory research program within the Surgery Branch will be provided. Salary is negotiable and commensurate with the candidates' level of experience. Applications from women and minorities are especially welcome. Candidates should send a letter of interest, curriculum vitae and bibliography. This material must be received by February 2, 2009, and mailed to: Dr. James C. Yang, Chair; Search Committee, Surgery Branch; Center for Cancer Research, NCI; c/o Carla Floyd, Executive Secretary; 9000 Rockville Pike; Bldg 10 Room 12N210 MSC 1904; Bethesda, MD 20892-1904. DHHS and NIH are Equal Opportunity Employers. The NIH is dedicated to building a diverse community in its training and employment programs.

###

Staff Clinician

Laboratory of Immunoregulation, NIAID

(deadline: February 5)

The National Institute of Allergy and Infectious Diseases (NIAID), Division of Intramural Research (DIR), Laboratory of Immunoregulation (LIR), Clinical Research Section (CRS), is seeking an outstanding Staff Clinician to participate in clinical research in the epidemiology, pathogenesis, and treatment of infectious diseases.

International research on emerging infectious diseases of global importance is a high priority for NIAID. The CRS/LIR is responsible for conducting time-sensitive, collaborative infectious disease research critical to the mission of NIAID and to the advancement of the DHHS Global Health Agenda. Fulfillment of this mission requires the capacity to carry out clinical research both on established pathogens with epidemic potential, such as seasonal influenza, and on emerging pathogens of major public health importance, such as avian influenza or SARS. The intramural program of NIAID is committed to expanding its clinical research capacity in the area of respiratory viral pathogens, a capacity that may include new or ongoing collaborations with extramural or indigenous researchers in endemic areas affected by these pathogens. This commitment will mirror current and future efforts to expand the intramural program's research portfolio on collaborative studies of HIV infection and its co-morbidities.

Candidates must be eligible to be credentialed to practice medicine at the NIH Clinical Center. The successful candidate will have board eligibility or certification in both internal medicine and infectious diseases and should have substantial experience managing patients with infectious diseases, including those with respiratory viral infections. The ideal candidate will have experience in developing and performing clinical research trials of viral diseases, such as influenza, and be able to manage patients independently. Salary depends on qualifications and experience.

Interested candidates may contact Dr. Richard Davey (rdavey@niaid.nih.gov <<mailto:rdavey@niaid.nih.gov>>) for additional information about the position. To apply, candidates must submit a curriculum vitae, bibliography, three letters of reference, a detailed statement of clinical research interests, and reprints of up to three selected publications to National Institute of Allergy and Infectious Diseases, Division of Intramural Research, c/o LIR Office of the Chief, Attn: Dr. Marybeth Daucher (mdaucher@niaid.nih.gov <<mailto:mdaucher@niaid.nih.gov>>), 10 Center Drive, Room 6A19, Bethesda, MD 20892-1884 by February 5, 2009. For further information about NIAID and available job opportunities, please visit: www.niaid.nih.gov/about/working <<http://www.niaid.nih.gov/about/working>> . DHHS and NIH are proud to be Equal Opportunity Employers.

###

Tenure-Track Investigator

Laboratory of Neurobiology, NIEHS

(deadline: February 13)

The Laboratory of Neurobiology is recruiting a Tenure-Track Investigator to lead a high-quality independent research program on any fundamental aspect of developmental neurobiology with the potential for identifying and preventing the deleterious effects of environmental exposures on human cognitive development. Investigators in the NIEHS intramural program have no formal teaching duties and minimal administrative responsibilities and are funded internally without extramural grants. In exchange, they are expected to engage directly in the conduct of research with a small group of postdoctoral fellows and technicians and to collaborate with their colleagues to solve important scientific problems related to the Institute's mission. Excellent start-up funds, salary, and benefits package will be provided to the selected applicant, who will also have access to state-of-the-art research core facilities at the NIEHS. Applicants should have a Ph.D, M.D., or equivalent doctoral degree with at least 3 years of postdoctoral research experience in developmental neurobiology and a strong publication record. Applicants using fluorescence imaging and genetic model organisms are particularly encouraged to apply, but the emphasis will be on identifying an outstanding scientist with an innovative research program. Interested persons should send their curriculum vitae with a statement of research interests, and arrange for three letters of recommendation to be submitted to the address below.

Applications received by February 13, 2009 will be given first consideration. Applications received after that date will be considered only if the position has not been filled. Mr. Will Williams (DIR-08-08); National Institute of Environmental Health Sciences; P.O. Box 12233, Maildrop A2-06; 111 South Alexander Drive, Room A235; Research Triangle Park, NC 27709. E-mail dir-appls@niehs.nih.gov <<mailto:dir-appls@niehs.nih.gov>> . DHHS and NIH are Equal Opportunity Employers.

###

Statistical Genetics Director

Laboratory of Genetics, NIA

(deadline: February 28*)

The National Institute on Aging (NIA), a major research component of the National Institutes of Health (NIH) and Department of Health and Human Services (DHHS), is recruiting for a Staff Scientist (Facility Head) who will serve as the Statistical Genetics Director of the Laboratory of Genetics (LG), Intramural Research Program (IRP), in Baltimore, MD. The incumbent will be responsible for collaborating in and coordinating statistical genetic and epidemiological analyses of aging-related human conditions and diseases. The collaborative research includes the adaptation or development of new analytic programs with participation in an interactive group studying genetic and epidemiological data for selected aging-related phenotypes in the Baltimore Longitudinal Study of Aging; in other outbred populations; and in the Sardinian "founder population".

Accordingly, the duties of this position require the applicant to hold a Ph.D. and have at least 2 years of additional postdoctoral experience in statistical genetics or comparable epidemiological statistics. Applicants must have a record of scientific accomplishments, including excellence in statistical analyses and qualifications to develop, update, and manage statistical staff and analysis software.

Salary is commensurate with experience and accomplishments. The salary range for Staff Scientists is \$82,961 - \$166,430. A full Civil Service package of benefits (including retirement, health, life and long term care insurance, Thrift Savings Plan, etc.) is available. Applicants must send curriculum vitae, bibliography, and three letters of recommendation to: Chair, LG Staff Scientist - Statistical Genetics Search Committee; Vacancy #NIA-IRP-09-02; c/o Peggy Grothe, Intramural Program Specialist; Office of the Scientific Director, National Institute on Aging, 251 Bayview Blvd, Suite 100, Room 04C221 Baltimore, MD 21224. Position will remain open until filled; however, the application review process will begin February 28, 2009. If additional information is needed, please call 410-558-8012 or email: grothep@grc.nia.nih.gov <<mailto:grothep@grc.nia.nih.gov>> .

###

Chief

Pulmonary Medicine Branch, NHLBI

(deadline: March 1)

The Division of Intramural Research of the National Heart, Lung and Blood Institute is seeking applications from exceptional clinical investigators for the position of Chief, Pulmonary Medicine Branch. The successful candidate will develop a robust clinical research program in the NIH Clinical Center, the 230 bed centerpiece of the NIH campus. The incumbent will also be expected to develop a pulmonary research network in the Washington area to take advantage of relevant patient populations at regional hospitals. It is anticipated that this program will also develop a pulmonary/critical care medicine fellowship program in conjunction with the well established Critical Care Medicine Department, Clinical Center and potentially with other regional universities.

An M.D. or M.D./Ph.D. degree and record of research accomplishments as evidenced by publications in major peer-reviewed journals are required. The clinical facilities and research laboratories are located in the new state-of-the-art, Mark O. Hatfield Clinical Center. This position comes with start up funding, as well as stable intramural personnel and budget support, with the expectation that the chief will recruit new tenure track faculty and staff clinicians. There is access to advanced core facilities, including the NIH Clinical Research Center; a pharmacy development service; a transgenic and knockout mouse facility; a state-of-art multi-modality imaging facility; an advanced fluorescent activated cell sorting facility; and state of the art genomics, microarray and proteomics.

The NHLBI is committed to developing a dynamic, highly productive clinical and basic pulmonary program that can provide national and international leadership in targeted areas. A competitive salary commensurate with experience and qualifications is offered. Appointees may be US citizens, resident aliens or non-resident alien with or eligible for a valid employment visa. Applications must be received by March 1, 2009. Please submit a curriculum vitae, brief statement of research interests and three letters of reference in PDF or MS Word format only (no paper applications will be accepted) to: Robert S. Balaban, Ph.D., Scientific Director, NHLBI; c/o Ariel Herman, IAMB Section Chief, NHLBI, at NHLBI_recruit@mail.nih.gov <mailto:NHLBI_recruit@mail.nih.gov?subject=>>. DHHS and NIH are Equal Opportunity Employers. Applications from women, minorities and persons with disabilities are strongly encouraged.

###

Deputy Scientific Director

Division of Intramural Research, NIMH

(deadline: March 2*)

The National Institute of Mental Health (NIMH), a major research component of the National Institutes of Health (NIH) and the Department of Health and Human Services (DHHS), is seeking exceptional candidates for the position of Deputy Scientific Director, Division of Intramural Research Programs (DIRP). The Deputy Scientific Director will work with the Scientific Director to lead and manage a vibrant intramural research program with more than 50 independent principal investigators, an extensive network of core service facilities (<http://intramural.nimh.nih.gov> <<http://intramural.nimh.nih.gov>>), and a budget above \$160M.

The Deputy Scientific Director will assist in the recruitment of new faculty, oversee the expansion of the Division and its programs into several state-of-the-art research facilities on the NIH's Bethesda, Maryland campus and help manage the scientific resources at the NIMH DIRP. Applicants must have a Ph.D., M.D., or equivalent degree in the biomedical sciences, with broad research experience and experience in direct administration of a multidisciplinary research program. Applicants may have the opportunity to perform independent and/or collaborative scientific studies. Applicants should be known and respected within their profession as distinguished individuals of outstanding scientific competence. Salary is commensurate with experience and accomplishments. Experience with NIH administrative policies, procedures, and operations is highly desirable but not essential.

Interested candidates should send a letter of interest, to include a complete description of research and administrative experience and rationale for applying for this particular position (2-3 pages maximum), contact information for at least six references, and a curriculum vitae and bibliography to: Dr. Susan Swedo, Chair, Search Committee for Deputy Scientific Director, DIRP, NIMH, c/o steyerm@mail.nih.gov <<mailto:steyerm@mail.nih.gov>> or to Bldg. 10, Rm. 4N-222, 9000 Rockville Pike, Bethesda, MD 20892-1381. Review of applications will begin on March 2, 2009, but applications will continue to be accepted and considered until the position is filled. DHHS, NIH, and NIMH are Equal Opportunity Employers.

###

Tenured or Tenure-Track Researcher

Metabolism Branch, NCI CCR

(deadline: April 1)

The Metabolism Branch, NCI, is searching for a tenure-track or tenured investigator engaged in laboratory-based research in the biology of normal or malignant lymphocytes. The research program should be in any area of basic or patient oriented investigation that complements the existing focus of the Branch on the pathogenesis, diagnosis or treatment of lymphomas or multiple myeloma. The Metabolism Branch is located on the Bethesda campus of the NIH.

Current areas of research include the molecular diagnosis of lymphomas, the use of genome-wide RNA interference screens to uncover molecular targets in cancer, the analysis of signal transduction and transcription factor networks in normal and malignant B cells, the biochemistry of transcriptional regulation, the development of monoclonal and cytokine-based therapies for lymphomas, and the clinical evaluation of novel chemotherapeutic strategies and molecularly-targeted therapies for lymphoma. Candidates for the position should have an M.D./Ph.D., Ph.D., or M.D. and strong research credentials. Applicants for this position should submit a curriculum vitae including bibliography, a statement of research interests, a two-page outline of the proposed research program, and three letters of recommendation to Chairman, Search Committee, Metabolism Branch NCI, Attention: Jean Decker, Bldg 10 Rm 4N115, 10 Center Drive, M.S.C. 1374, Bethesda, MD 20892-1374. You may also e-mail your application to deckerj@mail.nih.gov <<mailto:deckerj@mail.nih.gov>>. Applications should be submitted no later than April 1, 2009. DHHS and NCI are equal opportunity employers.

####

Staff Scientist / Animal Program Director

National Institutes of Aging

(deadline: open-ended)

The National Institute on Aging (NIA), a major research component of the National Institutes of Health (NIH) and Department of Health and Human Services (DHHS), is recruiting for a Staff Scientist-Facility Head who will serve as the Animal Program Director for the NIA Intramural Research Program (IRP), as well as Section Chief of the Comparative Medicine Section (CMS) of the Research Resources Branch (RRB). The incumbent will be responsible for an AAALAC accredited animal care and use program and for support of the animal research programs in the Institute, studying animal models of development and aging, and interventions to prevent or alleviate aging-related deficits. The supervisory and regulatory responsibilities of this position require the applicant to hold a veterinary degree (D.V.M., V.M.D., or equivalent degree) with certification or eligibility for board certification in laboratory animal medicine or veterinary pathology.

Applicants must have a proven record of management of an animal research program. The expertise and experience should include, but not be limited to interaction and cooperation with scientific staff in a manner that promotes and facilitates their scientific programs. Duties will include cost-effective breeding and maintaining numerous transgenic and knockout lines (currently in excess of 600) including "difficult" lines, collaboration with scientific staff in effective production and import of new genetically manipulated lines, and, especially, in maintaining a current and accurate database on the colony status. The incumbent will oversee animal health surveillance and maintain both a barrier facility and a quarantine area. The incumbent will perform animal surgery and teach appropriate procedures to animal care and technical staff.

Salary is commensurate with experience and accomplishments. The salary range for Staff Scientists is \$82,961 - \$166,430. A full Civil Service package of benefits (including retirement, health, life and long term care insurance, Thrift Savings Plan, etc.) is available. Additional information regarding the NIA, IRP and the RRB is available at the following websites:

<http://www.grc.nia.nih.gov> and <http://grc.nia.nih.gov/branches/rrb/rrb.htm> . To apply: Please send a cover letter, curriculum vitae, bibliography, statement of research interests, and three letters of recommendation to: Peggy Grothe, Intramural Program Specialist; Office of the Scientific Director; National Institute on Aging, 251 Bayview Boulevard, Suite 100- Room 04C232, Baltimore, MD 21224-6825. Advertisement is open until the position is filled. Please include the following vacancy number in all correspondence: Vacancy # NIA-IRP-08-09. If additional information is needed, please call 410-558-8012 or email: grothep@mail.nih.gov. DHHS and NIH are Equal Opportunity Employers.

###

Scientific Director, NIDCD

(deadline: open-ended)

The National Institute on Deafness and Other Communication Disorders (NIDCD) is seeking exceptional candidates for the position of Director, Division of Intramural Research (DIR). The incumbent serves as the principal advisor to the NIDCD Director on biomedical and scientific affairs involving the intramural research programs conducted by basic and clinical research investigators in the field of deafness and other communication disorders. This position offers a unique and exciting opportunity for an extremely capable individual to evaluate research efforts and establish program priorities; direct training of pre- and post doctoral fellows; collaborate with other NIH programs; and advise the NIDCD Director and senior staff of the DIR and areas of

science of interest to the Institute. The Division of Intramural Research has a staff of approximately 180 employees and a current annual budget of \$35 million dollars. In addition to the managerial/administrative responsibilities outlined above, the Scientific Director is expected to carry out his/her own research program. Resources commensurate with the proposed program will be provided. The NIDCD seeks candidates who have a commitment to scientific excellence and the energy, enthusiasm, and innovative thinking necessary to lead and direct the DIR's research efforts at the forefront of science.

Applicants must possess an M.D., Ph.D., or equivalent degree, and have demonstrated scientific leadership and research experience in either a basic or clinical research program of national and international standing in one or more of the areas of research that has or will contribute new knowledge in biomedical and behavioral issues recognized as part of the NIDCD mandate. Salary is very competitive and will be commensurate with the experience of the candidate. A full package of Civil Service benefits is available including: retirement, health and life insurance, long term care insurance, annual and sick leave and the thrift savings plan (401K equivalent). The position is subject to a background investigation.

Please submit a current Curriculum Vitae, Bibliography, and a Cover Letter describing why you are interested in and what you can bring to this position. Application packages should be sent to the National Institutes of Health (NIH), National Institute on Deafness and Other Communication Disorders (NIDCD), 31 Center Drive, MSC 2320, Building 31, Room 3C02, Bethesda, Maryland 20892 or sent via email to mundellg@mail.nih.gov. Additional information may be obtained from Dr. Eric Green at 301-402-2023 or at [greene@mail.nih.gov](mailto:greeneg@mail.nih.gov). All information provided by the candidates will remain confidential and will not be released outside the NIDCD search process without a signed release from candidate. Applications will be reviewed starting October 6, 2008, and will be accepted until the position is filled. NIH is an Equal Opportunity Employer.

###

Chief, Visuomotor Disorders Section

Laboratory of Sensorimotor Research, NEI

(deadline: open-ended)

The National Eye Institute (NEI) seeks an outstanding clinician scientist for a tenured or tenure-track position as Chief, Visuomotor Disorders Section in the Laboratory of Sensorimotor

Research (LSR) in the Division of Intramural Research. This recruitment is directed towards clinicians with expertise in central disorders that affect vision and/or eye movements (including disorders of binocular function). The post offers a unique opportunity for a talented individual to provide strong and stimulating leadership in an organization dedicated to uncovering new scientific knowledge, both laboratory and clinical. We welcome the full range of candidates at all levels.

The Laboratory of Sensorimotor Research is devoted to understanding the organization of the brain related to the control of eye movements, visual perception and their disorders. The Visuomotor Disorders Section Chief is expected to create a vigorous research program dedicated to elucidating the role played by these brain mechanisms in human disease, and to explore treatments. The Chief will develop broad investigational plans, independently and in collaboration with other NEI investigators and research scientists in the United States and abroad. The Chief will examine and treat patients, as well as design, implement and conduct research and clinical protocols. An opportunity exists for the Section Chief to recruit staff and supervise training. The NEI provides an exceptional environment for clinical research including the infrastructure necessary for patient recruitment, a clinical protocol development group, and a Contract Research Organization that provides statistical and epidemiological expertise, data management and analysis, study monitoring, regulatory guidance, and overall operational support. The NIH Clinical Center provides additional access to exceptionally broad medical and diagnostic resources. In addition, the LSR provides exceptional support for more specialized needs, such as the measurement of eye movements and computational analysis/modeling.

The position requires an ability to integrate basic, clinical and translational research, and create an intellectual synergy and an environment for state-of-the art patient care for those suffering from visual dysfunction. At a minimum, candidates should have a Doctor of Medicine degree from a school in the U.S. or Canada approved by a recognized accrediting body in the year of the applicant's graduation, or a Doctor of Medicine or equivalent degree from a foreign medical school which provided education and medical knowledge substantially equivalent to accredited schools in the United States. Candidates should be Board-certified, board eligible or equivalent, have direct clinical experience. Salary is commensurate with research experience and accomplishments. A full Federal package of benefits is available (including retirement, health, life and long term care insurance, Thrift Savings Plan etc). Applicants should submit curriculum vitae, bibliography, copies of their five most significant publications, a summary of research accomplishments and three reference letters. Applicants should also submit a written statement with their perspective on the needs and opportunities necessary to move from the basic understanding of brain mechanisms supporting vision and eye movements to clinical therapeutic interventions and improved patient care. This statement should indicate how the applicant's particular expertise and background could contribute to this transition. Applications should be sent to: Mica Gordon, Executive Assistant, Office of the Scientific Director, National Eye Institute, Building 31, Room 6A22, 31 Center Drive, Bethesda, MD 20892; Tel: 301-451-6763, Email: gordonmi@nei.nih.gov. NIH is dedicated to building a diverse community in its training and employment. NIH is a part of the U.S. Department of Health and Human Services.

###

Investigator Recruitment in Cancer Genetics, NHGRI

(deadline: open-ended)

The Cancer Genetics Branch (CGB) of the National Human Genome Research Institute (NHGRI) is seeking to recruit an outstanding tenure-track investigator to pursue innovative, independent research in cancer genetics. General areas of interest include, but are not limited to: Cancer Gene Discovery, Comparative Cancer Genomics, Genetic Epidemiology, Molecular Profiling of Tumors, Functional Genomics of Cancer, Genome Instability in Cancer, Markers for Early Detection, and Genetics of Tumor Progression.

The successful candidate will be able to take advantage of interactions with a highly collegial group of scientists within NHGRI and on the NIH campus as a whole. In addition, they will have access to NHGRI's outstanding core laboratories. Candidates must have a Ph.D., M.D., or equivalent degree, as well as comprehensive, advanced training and a record of accomplishment in one of the targeted areas. This position includes generous start-up funds, an ongoing commitment of research space, laboratory resources, and positions for personnel and trainees. Interested applicants should submit a curriculum vitae, a three-page description of their proposed research, and three letters of recommendation through our online application system, at <http://research.nhgri.nih.gov/apply>.

Applications will be reviewed starting November 21, 2008, and will be accepted until the position is filled. For more information on CGB and NHGRI's Intramural Program, please see <http://genome.gov/DIR>. Specific questions regarding the recruitment may be directed to Dr. Joan Bailey-Wilson (Search Chair) at jebw@nhgri.nih.gov or by fax at 410-550-7513. Questions may also be directed to Dr. Elaine Ostrander, Chief, Cancer Genetics Branch, at eostrand@mail.nih.gov or by fax at 301-480-0472. Investigator Recruitment in Cancer Genetics National Human Genome Research Institute. DHHS and NIH are Equal Opportunity Employers and encourage applications from women and minorities.

###

Investigator Recruitment in Genetic Disease Research, NHGRI

(deadline: open-ended)

The Genetic Disease Research Branch (GDRB) of the National Human Genome Research Institute (NHGRI) provides unparalleled opportunities for young investigators to develop world-class research programs in genetics and genomics. The Branch is pleased to announce that it is seeking to recruit a new tenure-track investigator to pursue innovative, independent research as part of this group of highly interactive and supportive investigators. Current GDRB faculty members use a variety of approaches to study the regulation and function of genes involved in normal and abnormal development, focusing on diseases in both humans and model systems. We are seeking to recruit an individual whose research interests and approaches complement those already found within the Branch. Specifically, the ideal candidate will have an interest in developing a research program that integrates: Clinical or translational research; Molecular and genomic approaches aimed at understanding the mechanisms of normal development and disease; and Basic genetic or genomic research.

The Branch strongly supports interdisciplinary research, with NHGRI faculty providing mentoring and guidance to individuals interested in developing research programs involving basic, clinical, and translational approaches. The successful candidate will be able to take advantage of interactions with a highly collegial group of scientists within NHGRI and on the NIH campus as a whole. In addition, the successful candidate will have access to NHGRI's outstanding core laboratories, as well as the unparalleled resources of the NIH Clinical Center. Candidates must have a Ph.D., M.D., or equivalent degree, as well as comprehensive, advanced training and a record of accomplishment in one of the targeted areas. This position includes a generous start-up allowance, an ongoing commitment of research space, laboratory resources, and positions for personnel and trainees. Interested applicants should submit a curriculum vitae, a three-page description of proposed research, and three letters of recommendation through our online application system, at <http://research.nhgri.nih.gov/apply>.

Applications will be reviewed starting Monday, December 15, 2008, and will be accepted until the position is filled. For more information on GDRB and NHGRI's Intramural Program, please see <http://genome.gov/DIR>. Specific questions regarding the recruitment may be directed to Dr. William Pavan, the Search Chair, at bpavan@nhgri.nih.gov. Questions may also be directed to Dr. Leslie Biesecker, the GDRB Branch Chief, at leslieb@nhgri.nih.gov. Investigator Recruitment in Genetic Disease Research National Human Genome Research Institute. DHHS and NIH are Equal Opportunity Employers and encourage applications from women and minorities.

###

Molecular Biologist

Thoracic Oncology Section, NCI

(deadline: open-ended)

The Thoracic Oncology Section, Surgery Branch, National Cancer Institute, National Institutes of Health seeks to recruit for immediate appointment an outstanding Molecular Biologist to extend ongoing studies pertaining to epigenetic and microRNA- mediated regulation of gene expression in thoracic malignancies. The successful candidate must have at least 3 years post-doctoral experience, and documented productivity and expertise in cancer epigenetics, including including EMSA, DNA methylation arrays, MSP, bisulfite and pyro-sequencing and ChIP. Candidates with documented experience and productivity regarding analysis of micro-RNA expression in cancer cells are of particular interest. This position offers a unique opportunity to contribute to fundamental pre-clinical studies pertaining to the effects of tobacco smoke on the epigenome, as well as translational research regarding the use of DNA demethylating agents and HDAC inhibitors in lung cancer patients. Interested applicants should submit a cover letter, curriculum vitae, publication list, and three letters of reference to: David S. Schrupp, M.D.; Senior Investigator and Head; Building 10, 4-3940; 10 Center Drive, MSC 1201; Bethesda, MD 20892-1201. Tel: 301-496-2127; fax: 301-451-6934; e-mail: david_schrump@nih.gov.

###

Tenured or Tenure-Track Investigator

Clinical Center & NINDS

(deadline: open-ended)

The Division of Intramural Research of the National Institute of Neurological Disorders and Stroke and the Radiology and Imaging Sciences Program of the Clinical Center are recruiting an individual for a tenure-track/tenure eligible position in the area of neuroimaging with a focus on clinical research in multiple sclerosis. The individual will develop and direct an independent research program on imaging diseases of the nervous system and especially multiple sclerosis. The program will conduct its work in conjunction with the Neuroimmunology Branch (NIB),

which was established to study the cause and treatment of immunological mediated diseases of the central nervous system. The successful candidate will be able to develop strong interactions with an active neuroradiology program and an active neuroimaging program at the NIH. The individual should have a demonstrated background and knowledge in research focused on neuroimaging diseases of the nervous system. In addition to imaging expertise, the individual should have experience in neurology and/or radiology and the application of clinical trial methodology to the study of disease mechanisms and testing new therapies.

The candidate will have earned a M.D. or Ph.D. degree and will have excellent scientific skills in structuring an original and productive research program using outstanding communication and collaborative abilities. Preference will be given to individuals who have a medical license in the United States, who have completed training in an accredited training program in radiology or neurology, and is either board eligible or board certified in one of these disciplines. In rare cases outstanding senior candidates will be considered for a tenured position if there is a demonstrated international reputation and well-documented evidence of ongoing independent accomplishments. An individual selected for a tenure-track position is expected to build a dynamic and productive research group. Laboratory facilities, state-of-the-art neuroimaging facilities, research funds and salary are competitive with premier academic institutions.

Applicants should send curriculum vitae, bibliography, statement of research interests, and have three letters of reference sent to: Alan Koretsky, Ph.D., c/o Peggy Rollins; Office of the Scientific Director, Division of Intramural Research; National Institute of Neurological Disorders and Stroke, NIH; Building 35 Room GA908; Bethesda, MD 20892; or to Peggy.Rollins@nih.gov <<mailto:Peggy.Rollins@nih.gov>> . Applications will be reviewed upon receipt. HHS and NIH are Equal Opportunity Employers.
